

AO-SERIES COUPLING SUMMARY

The AO-Series hydraulic coupling product line includes economically designed couplings with working pressures up to 15,000 psi and water depth capability to over 5500 meters (18,300 ft.) with proper seal selection. These couplings are constructed of premium Nitronic stainless steel, utilize a single patented dovetail crown seal between mating halves and are designed for ease of seal replacement. Coupling designs are tailored to customer mounting and end connection specifications.

Applications

The AO-Series couplings are adaptable to a wide range of applications, including flying lead connectors, umbilical terminations, subsea junction plate assemblies, etc.
